

## Dancing for a good cause!

For several years, I worked in the pulmonary lab at Charity Hospital in New Orleans performing lung studies on folks with a variety of lung diseases. The pure heartbreak of watching a patient gasping for breath stays with one for life. Then, my beloved father-in-law was diagnosed with a chronic and incapacitating lung disease.

More men and women die of lung cancer than any other type of cancer. Their courage in the face of challenge motivates me to help by raising research dollars to find cures for lung cancer and other debilitating lung conditions because great strides have been made already.

On November 10<sup>th</sup> we will be Dancing With the Local Stars at the 5<sup>th</sup> Annual Oxygen Ball for the American Lung Association. Please lend your support by voting for FAN FAVORITE!

Your assistance furthers the mission of the American Lung Association. Vote by making a donation here:
